Many of us now travel to exotic destinations and this means we should give consideration to protecting ourselves from the risk of infections that are not commonly encountered in the United Kingdom.

Always think about budgeting for your holiday vaccinations and malaria medication when you book your exotic trip as these are outside of NHS Funding and the costs may be higher than you expect.

You may require immunisations that boost previous vaccines or will require specific vaccinations against less common conditions e.g. Japanese Encephalitis, Yellow Fever, Cholera, Malaria etc.

Plan and book your immunisations 6-8 weeks before your intended departure date, children travelling with you may also require vaccinations/prescriptions. Using up to date information we can tailor a suitable course of vaccinations for each traveller. Protecting you and your family is very important.

Stanmore House Surgery is a designated Yellow Fever Vaccination Centre. This means that vaccination and certification can be provided to the individual who is planning to travel to areas where Yellow Fever is present. Some countries will not allow access unless appropriate certification is provided.

If you need a booster for of your UK jabs these are free on the NHS:

- Diphtheria, polio and tetanus
- Typhoid
- Hepatitis A
- Cholera

Due to the cost of these vaccines the practice requires you to pay in full prior to commencing the vaccine program. We accept cheques, cash or via bank transfer.
